

New Airfence for the Australian Superbikes!

Airfence installed at T3, Queensland Raceway.

The Australian Superbike Series racers have long had the advantage of Airfence protection. But with some Airfence sections over 15 years old it was time for an upgrade. So this year, with generous funding from Motorcycling Australia, 21 new sections of Airfence IIs, providing up to 170m of first class impact protection have been deployed at the series events.

A new logistics system for installing, removing and transporting the Airfence has also been designed and deployed. This saves the promoter many man-hours of work at each event and keeps the Airfence in top condition. [Contact us](#) if you would like to know more of how this works.

2008 Champion Allerton and contender Josh Walters in battle at Symmons Plains and youngsters on 125's are provided with the 5 new Airfence protection.

Airfence IIs pack-up with the new logistics system at Symmons Plains, Tasmania.
